The Need project has given me and many others at my campus the tools necessary to teach engaging lessons on energy. Not only were we given tested lessons, we also increased our own teacher knowledge of the subject in just 1 short day!

NEED National Sponsors and Partners 42
The NEED Project includes innovative K-12 educational materials, teacher and student training programs, evaluation, and recognition. NEED materials and training conferences are designed to provide comprehensive, objective information about energy production and consumption and the major energy sources—how they are used and their impact on the environment, economy, and society. The program emphasizes the development of critical thinking and problem-solving skills using inquiry activities that encourage students to consider the trade-offs inherent in energy decisions.

NEED materials have been designed to meet the needs of teachers and students, support the Next Generation Science Standards, and are correlated to all state science standards and the Common Core State Standards for Language Arts and Math. For more information on curriculum correlations, visit www.NEED.org/curriculumcorrelations.

Activities are available at all grade levels and are even used in technical schools, community colleges, and universities. Materials incorporate NEED’s Kids Teaching Kids approach to education by encouraging students to teach others. The NEED Project relies on a Teacher Advisory Board to ensure that all curriculum materials are objective, up-to-date, scientifically accurate, and meet the requirements of national and state standards.

NEED works with school districts and teachers across the country to design and implement individualized energy programs to meet their education goals and objectives. In many areas, NEED materials are incorporated into the formal curriculum at multiple grade levels. NEED tailors programs to meet the specific requirements of individual states, school districts, and teachers. NEED is fortunate to be the education partner for many local, state, and national energy outreach programs.

The National Energy Education Development (NEED) Project is a 501(c)(3) nonprofit education association incorporated in the Commonwealth of Virginia. The mission of NEED is to promote an energy conscious and educated society by creating effective networks of students, educators, business, government, and community leaders to design and deliver objective, multi-sided energy education programs. Established by Presidential Proclamation in 1980, NEED is a dynamic, engaging program present in thousands of schools nationwide.
NEED Curriculum Packet

Any educator can become a part of NEED’s dynamic network of schools across the nation participating in innovative energy education programs. NEED educators receive a 2017-2018 NEED Curriculum Packet; e-newsletters; invitations to NEED conferences, workshops, and the Youth Energy Conference and Awards Program; and the opportunity to personalize classroom programs by accessing materials on the NEED website. Teachers can download all curriculum guides and supplemental materials in NEED’s library for free from NEED’s online store and website.

NEED Curriculum Packets are provided by sponsors to all educators who attend NEED workshops. Each packet includes a sampling of NEED’s favorite materials. The 2017-2018 Curriculum Packet includes the following titles:

ENERGY INFOBOOKS

NEED’s Energy Infobooks are provided in primary, elementary, intermediate, and secondary reading levels. The guides provide background and basic information on the sources of energy, electricity, transportation, conservation and efficiency, and consumption. The Infobooks can be used in the classroom as nonfiction text support for many NEED activities. Class sets of the elementary, intermediate, and secondary versions are available. The primary version of the guide is designed for teachers to read aloud to students. The Infobooks are revised every year to provide complete, up-to-date information. Infobooks are also available on NEED’s website as individual factsheets, and as e-publications.

ENERGY GAMES AND ICEBREAKERS

This guide contains entertaining games and activities that serve as excellent introductions to an energy unit, or fantastic formative assessment tools to use during a unit or as a review. Games include Electric Connections, Energy Chants, Energy Roundup, Energy Bingo, Energy Web Game, Candy Collector, and more.

EXCELLENT ENERGY ENGINEERING AND DESIGN

Students are always up for a challenge. Turning a lesson into an engineering and design challenge is a fun way for students to explore a concept more deeply while sharpening their science process skills. This sampler encourages teachers to look at some of NEED’s most popular activities in an entirely different way, leaving those student instructions worksheets behind! These activities will allow students to design, create, build, optimize, and improve as they tackle creating a battery, constructing a generator, building an efficient house, getting the oil out, and more! Looking for more activities and content to support these engineering activities? Check out our energy source units and efficiency and conservation units on pages 16-24, and 27-30 for more information and examples.

INTERACTIVE ENERGY SIMULATIONS

We’ve all heard the statement “actions speak louder than words.” In this energized sampler, students will explore energy concepts that may be tough to grasp or visualize by acting them out in simulations. Each activity has students assume a role as they work towards understanding an energy concept or process. Students can become electrons in a PV cell simulation, assume the role of a carbon molecule in the carbon cycle, act as the transmission organization to balance electrical demand, pretend they are the cooling loop in a nuclear power plant, and more. These simulations are great ways to get the class up and moving, while reinforcing vocabulary and demonstrating difficult concepts. Individual simulations can be found throughout many of NEED’s energy sources, electricity, and efficiency and conservation units. Check out pages 16-30 for more information on these units.

Turn the page for more information about this year’s curriculum packet!
TRANSPORTATION TRIO

No matter the legal driving age in their location, many teachers find that kids take an interest in cars and transportation. It’s something most every kid can relate with. These fun activities introduce students to the ways we get from “Point A” to “Point B” and how we move the things we depend on. Students will become familiar with the various fuels available to vehicles, the modes in which we get around, and just how far they can travel on a tank of gas (or equivalent!). These activities can all be found within NEED’s brand new suite of transportation materials. For more information on transportation resources, check out page 26.

NGSS AND NEED

New to NGSS or teaching energy? This sampler provides a workbook to help you plan your energy lessons while ensuring that you are meeting the requirements set forth by the Next Generation Science Standards. This guide provides step-by-step explanations of energy standards, with a work space and examples, intended to help you design an energy unit that incorporates NEED curriculum materials while adhering to the three-dimensional learning framework of the NGSS. To view all standards correlations, visit www.NEED.org/curriculumcorrelations.
NEED Curriculum

NEED curriculum is developed by a national Teacher Advisory Board (TAB) that is dedicated to developing and promoting standards-based energy curriculum and training. The curriculum employs a number of strategies for teaching students about energy. Most NEED modules are inquiry-based, using a Kids Teaching Kids approach. Activities that are not inquiry-based are highly engaging and interactive, helping students to develop and access critical thinking skills. NEED strongly believes in integrating energy education across all subject areas including science, technology, engineering, mathematics, language arts, social studies, and creative arts.

NEED also believes in providing the most recently reported energy data available to our teachers and students. Most statistics and data are derived from the most recent, complete annual data made available by the U.S. Energy Information Administration at the time of publishing. Working in partnership with the EIA, NEED includes easy to understand data in our curriculum materials.

In order for students to receive a comprehensive energy education, NEED has developed an eight-step model to help teachers plan a complete energy unit. Each step of the model is outlined on page 8. NEED has designed Basic Curriculum Units for each grade level that follow this comprehensive model for energy education. For more information on these basic units, see page 9. Educators may easily build their own units that follow this eight-step model. NEED’s entire portfolio is available online. If large quantities of a title are needed, please contact NEED for more information on printed titles and requests for printing.

On pages 10-11 is a matrix of all available NEED materials categorized by NEED’s eight-step energy education model and by grade level. Educators may use this list and the curriculum descriptions found within this guide to customize their own energy unit. Pages 12-13 include a list of additional resources that can enhance instruction.
STEP ONE: SCIENCE OF ENERGY

Students need to learn the science of energy before they can learn about the sources of energy, electric power generation, and energy efficiency and conservation. Students learn the forms of energy and how energy is transformed from one form into other forms. Secondary students can extend their knowledge to thermodynamics. Several hands-on kits are available for sale or rental, such as primary, elementary, intermediate, and secondary Science of Energy, and EnergyWorks.

STEP TWO: SOURCES OF ENERGY

These materials help students to become familiar with the energy sources used today—their formation, exploration, production, distribution, consumption, and economic and environmental trade-offs. Several units and kits are available that explore specific energy sources. NEED Energy Infobooks also provide comprehensive information on the major energy sources at four reading levels.

STEP THREE: ELECTRICITY AND MAGNETISM

These materials provide students with information and hands-on explorations of the scientific concepts of electricity and magnetism, electricity generation, transmission, and efficient use of electricity. Wonders of Magnets explores the basics of magnetism, while Energy Infobooks provide background information on electricity. NEED’s ElectroWorks curriculum is available, as well as solar, wind, nuclear, coal, and hydropower units and kits that include hands-on activities on electromagnetism. Current Energy Affair provides students with language arts activities about electricity.

STEP FOUR: TRANSPORTATION

Several modules are available that teach students about the transportation sector of the economy, current transportation fuels, and fuels and technologies of the future. Try Transportation Fuels Enigma and/or Transportation Fuels Debate for two fun ways to introduce transportation and get your energy unit moving!

STEP FIVE: EFFICIENCY AND CONSERVATION

Students learn how energy is consumed in our lives, about efficient technologies, and ways to conserve energy at home and at school. Energy efficiency and conservation curriculum materials and kits are available for all grade levels.

STEP SIX: SYNTHESIS AND REINFORCEMENT

Many critical thinking and hands-on activities are available to help support the information the students have learned. Activities for students to teach others what they have learned are also available.

STEP SEVEN: EVALUATION

Most NEED activities include evaluation strategies within them, including pre- and post-assessments, rubrics, and project-based tasks. NEED’s Evaluation website contains several examples of these tools for use in the classroom. One such tool, NEED’s Question Bank gives teachers the ability to customize evaluation tools to fit the needs of their energy unit. Also found on the website are NEED’s Energy Polls, multiple choice energy knowledge polls, at four grade levels. Visit www.NEED.org/evaluation to download the polls, search for assessment questions, view sample rubrics, and for links to standards correlation information to fuel your planning.

STEP EIGHT: STUDENT LEADERSHIP AND OUTREACH

NEED’s Youth Awards Program for Energy Achievement and Youth Energy Conference rewards students and classrooms for documenting their energy outreach efforts and student leadership. See page 35 or visit www.NEED.org/youth-awards for more information about the Youth Awards Program and Conference. The deadline for project submissions is April 15, 2018.
NEED Basic Curriculum Units

NEED Basic Curriculum Units

The Teacher Advisory Board has designed NEED’s Basic Curriculum Units at four levels to help new teachers implement energy units in their classrooms. These units are designed to meet national and state standards for each level by teaching the science of energy, sources of energy, electricity and magnetism, transportation, and efficiency and conservation. Synthesis, reinforcement, evaluation, student leadership, and outreach activities are also included.

A teacher may choose to use the NEED Basic Curriculum Unit as shown below by level. Download each basic unit by visiting www.NEED.org/basicunits. Teachers may also customize the unit by choosing guides or units that meet the needs of the students. Descriptions of all NEED curriculum guides are contained in this catalog. All titles in NEED’s library can be downloaded from NEED’s website and online store. Kit-based guides and infobooks are also available in print. See pages 14-29 for pricing information of printed items, where available.

To access each basic unit and download its components, please visit www.NEED.org/basicunits. If large quantities of a title are needed, please contact NEED for more information on printed titles and print requests.

NEED Curriculum Matrix

The NEED Curriculum Matrix on the following pages is designed to assist teachers in planning an individualized energy unit. All NEED curriculum guides are listed by grade level, and by where the majority of information in the material fits into NEED’s recommended eight-step model. Descriptions of the curriculum can be found starting on page 14.

It is important to note that many curriculum pieces overlap steps. NEED Energy Infobooks are the foundational pieces of any energy education unit. Written at four levels—primary, elementary, intermediate, and secondary—these student readers have in-depth information on the major energy sources, electricity, transportation, and conservation.

Subject specific guides like the wind and nuclear modules have more extensive separate student backgrounders on the subject. Information in these guides include how the source is formed, how we harness energy from the source, and how we use the energy source to meet our needs. Information on historical uses of the source, electricity generation, developing technologies, and related careers are often included as well.

Whether using a NEED Basic Curriculum Unit or selecting individual curriculum pieces, teachers should thoroughly review all materials and plan their units according to the needs of their students and their classroom timing and sequencing.

Note: All curriculum is available to download in PDF format from www.NEED.org.
* Guides with asterisks (*) are also available in print. Please contact NEED for more information on printed titles and print requests.
**Additional Resources**

**NEED CURRICULUM**
Go to shop.need.org to view the guides by grade level or topic. All NEED guides are available as a free PDF download.

**AWESOME EXTRAS!**
Looking for more resources? Our Awesome Extras page contains PowerPoints, animations, Energy At-a-Glance Fact Sheets, coloring pages, and other great resources to compliment what you are teaching in your classroom! This page is available under the Educators tab at www.NEED.org.

**THE BLOG**
We feature new curriculum, teacher news, upcoming programs, and exciting resources regularly. To read the latest from the NEED network, visit www.NEED.org/blog_home.asp.

**ONLINE REGISTRATION FOR WORKSHOPS**
NEED offers professional development opportunities that energize teachers and remind them of the fun that is possible in the classroom when teaching about energy. These workshops are offered all over the country. View all of our upcoming events and register online at www.NEED.org/calendar_list.asp.

**EVALUATIONS AND ASSESSMENT**

**NEED ENERGY BOOKLIST**
Looking for cross-curricular connections, or extra background reading for your students? NEED’s booklist provides an extensive list of fiction and nonfiction titles for all grade levels to support energy units in the science, social studies, or language arts setting. Check it out at www.NEED.org/booklist.asp.

**U.S. ENERGY GEOGRAPHY**
Maps are a great way for students to visualize the energy picture in the United States. This set of maps will support your energy discussion and multi-disciplinary energy activities. Go to www.NEED.org/energyinsocietymaterials to see energy production, consumption, and reserves all over the country!

**Order Materials Online!**

**SHOP.NEED.ORG**
Anemometers and solar cells and light meters-- oh my! Getting your kits (or refills) has never been easier! Check out NEED’s official online store at http://shop.need.org.

**A NEW WAY TO DOWNLOAD!**
All titles in NEED’s library can now be downloaded from NEED’s online store. PDFs of the guides are available for FREE download.

**Vintage NEED**
NEED has been sharing our energy since 1980! And just like fashions and seasons change, curriculum titles come and go as NEED gets older. If you download a book and see this cover, it means this particular title is an oldie, but a goodie. This guide is no longer on NEED’s annual update list, but we don’t want to say goodbye just yet! And, while data may not be current, the activities inside are still loads of fun. So, download and enjoy because it’s okay to kick it old school!
E-Publications

The NEED Project offers e-publication versions of various guides for classroom use. Guides that are currently available as an e-publication can be found at www.issuu.com/theneedproject.

Social Media

Stay up-to-date with NEED. “Like” us on Facebook! Search for The NEED Project, and check out all we’ve got going on!

E-Publication
ENERGY FLOWS
Grades 5-12
This hands-on activity explains the forms of energy and energy transformations to students. It can be used as a stand-alone activity or a companion activity to the Science of Energy Kit.

ENERGY INFOBOOKS
Grades K-12
Energy Infobooks are the resource for many NEED activities and include an introduction to energy, information on major sources of energy, new technologies, energy conservation, electricity, climate change, and other energy information. They are available on four reading levels and are revised and updated annually.

Primary Energy Infobook $ 2.50
Elementary Energy Infobook $ 2.50
Class Set of 30 Elementary Energy Infobooks $ 50.00
Intermediate Energy Infobook $ 2.50
Class Set of 30 Intermediate Energy Infobooks $ 50.00
Secondary Energy Infobook $ 3.00
Class Set of 30 Secondary Energy Infobooks $60.00

I USE THE SCIENCE OF ENERGY WHEN I TEACH AN ENERGY UNIT IN MY PHYSICS CLASS. MY STUDENTS ENJOY THE LESSONS THEY GET TO TEACH AND IT ADDS VARIETY TO THE CURRICULUM.  
- IDAHO TEACHER

ENERGYWORKS AND KIT
Grades 4-8
The EnergyWorks suite includes background information and hands-on experiments that explore motion, light, sound, heat, growth, and powering technology. Teacher demonstrations are also included.

The kit includes a Teacher Guide, a class set of 30 Student Guides, and most of the equipment necessary to conduct the experiments. Replacement parts can be purchased separately so that the kit can be used for many years. Prices and information about replacement items can be obtained by calling 1-800-875-5029.

Teacher and Student Guides $ 6.00
EnergyWorks Kit $ 450.00
4–Week Rental of EnergyWorks Kit $ 250.00
Class Set of 30 Student Guides $ 60.00
PRIMARY SCIENCE OF ENERGY AND KIT
Grades K-3

This unit includes background information and hands-on experiments to explore the fundamental concepts of energy while practicing their science process skills. Students explore the science of motion, heat, sound, and light with a series of simple activities that incorporate both English and metric measurements, using safe student thermometers, balances, rulers, measuring tapes, beakers, and graduated cylinders. Students learn to make observations, measure, record results, compare and contrast, categorize, make predictions, analyze and graph results, and draw conclusions.

The *Primary Science of Energy* Kit includes a comprehensive, step-by-step Teacher Guide with background information on the energy topics covered, instructional masters, and detailed instructions for each activity. The kit also includes a class set of 30 Student Guides and the materials needed for the students to conduct the experiments. Replacement parts can be purchased separately so that the kit can be used for many years. Prices and information about replacement items can be obtained by calling 1-800-875-5029.

Teacher and Student Guides $ 5.00
Primary Science of Energy Kit $ 275.00
Class Set of 30 Student Guides $ 50.00

SCIENCE OF ENERGY AND KIT
Elementary Guide (Grades 3-5)
Intermediate Guide (Grades 6-8)
Secondary Guide (Grades 9-12)

This unit provides background information and hands-on experiments to explore the different forms of energy and how energy is transformed from one form to another. Groups of students master six stations, then teach others about the energy transformations at their stations. Teacher demonstrations are included to introduce the unit. Reinforcement activities are also included. The stations include equipment to teach transformations, focusing on kinetic and potential energy, heat, light, motors, batteries, and electromagnetism.

The kit includes all three leveled guides (elementary, intermediate, and secondary), which include detailed teacher instructions, student instructions for the six stations, laboratory safety procedures, and the equipment necessary to conduct the experiments. The *Science of Energy* Kit is available for sale or rental and works with all three levels of curriculum.

A Class Set of Consumables contains 8 glow sticks, 8 handwarmers, 1 jar of calcium chloride, 10 balloons, 1 toy car, 10 rubber bands, 1 set of nails and wires, 1 solar cell, 1 live wire, and 1 candle.

Replacement parts can be purchased separately so that the kit can be used for many years. Prices and information about replacement items can be obtained by calling 1-800-875-5029.

Elementary, Intermediate, or Secondary Guides $ 4.00
Science of Energy Kit $ 300.00
4–Week Rental of Science of Energy Kit $ 250.00
Class Set of Consumables $ 50.00

THERMODYNAMICS
Grades 9-12

This unit includes hands-on experiments that explore concepts of thermodynamics. The Teacher Guide contains detailed teacher instructions, a list of materials, answer keys for laboratory experiments, and a sample unit exam, while the Student Guide includes background information and student worksheets. Thermal energy topics covered include: molecular structure, conduction, convection, radiation, specific heat, heat of fusion, and heat of vaporization.
COAL
Grades K-12

Through hands-on, multi-disciplinary activities and background reading, students learn about coal formation and chemical properties, coal mining, the uses of coal, its role in electricity generation, environmental impacts, and careers related to coal mining and electricity generation.

All About Coal (K-5)
Understanding Coal (6-8)
Exploring Coal (9-12)

DIGITAL ENERGY
Grades 5-12

In Digital Energy students are tasked with researching an energy topic and creating a digital media presentation that teaches others about their topic. Throughout the project, students will analyze the importance of graphic elements in learning and presenting, and must synthesize the information they read to create their own graphics. Digital Energy projects also encourage students to prepare a script, write an assessment for their audience, and facilitate discussion after presenting. This activity is great for differentiated environments and multi-disciplinary classrooms, and can be a great building block after completing Energy Expos in your classroom.

ENERGY GAMES AND ICEBREAKERS
Grades K-12

This guide contains entertaining activities to introduce energy, efficiency, and conservation to students, as well as reinforce the information that has already been presented. Activities make wonderful formative assessment tools for use during any energy unit.

ENERGY IN THE BALANCE
Grades 3-5

This activity introduces elementary students to the advantages and disadvantages of the major energy sources through a series of critical thinking, charting, and graphing activities.

ENERGY INFOBOOKS
Grades K-12

Energy Infobooks are a great supporting resource for many NEED activities and include an introduction to energy, information on major sources of energy, new technologies, energy conservation, electricity, climate change, and other energy information. They are available on four reading levels and are revised and updated annually.

See page 14 for pricing.

ENERGY INFOBOOK ACTIVITIES
Grades K-12

These guides contain companion activities to the Energy Infobooks. They are available on four reading levels that correspond to the infobooks and include teacher guides and answer keys for general energy information, energy sources, electricity, and conservation. Digital versions of the games can be accessed by visiting www.NEED.org/games.

ENERGY LIVE!
Grades 4-12

In this amped-up activity, student musical groups write songs and sing about energy sources, electricity, and conservation and efficiency. Audiences learn more from these energy stars as they tell their stories to interviewers out to get the latest energy scoops. Teacher and student instructions are included, along with sample songs and interviews to get students rockin’ and rollin’.
ENERGY ON PUBLIC LANDS
Grades 6-8
Students learn about energy resources found on public lands, and how they are managed by the Bureau of Land Management. This guide includes background information and cooperative learning activities for students to teach others.

ENERGY STORIES AND MORE
Grades K-5
This guide contains a series of stories and hands-on activities that can be used to introduce basic energy concepts and the major energy sources to primary and elementary students.

EXPLORING OCEAN ENERGY AND RESOURCES
Grades 5-12
In this unit, students learn and teach others about the energy and resources found in, under, and near the ocean, such as oil, natural gas, tides, waves, winds, and ocean currents. Students also explore the processes in which these energy sources are retrieved and how we care for the ocean environment.

GREAT ENERGY DEBATE
Grades 6-12
Students evaluate the advantages and disadvantages of the major energy sources in a debate format. Each student group represents one of the energy sources and develops arguments on the merits of its energy source over the other energy sources. Teacher instructions and instructional masters are included.

H₂ EDUCATE AND KIT
Grades 6-12
Intermediate and secondary students are introduced to hydrogen as an important energy carrier — both as a fuel for distributed generation and as a transportation fuel. Students conduct experiments in electrolysis, learn about atomic structure and the periodic table, make molecular models, simulate how a fuel cell works, and explore a hydrogen fuel cell car kit. The kit includes a Teacher Guide, a class set of 30 Student Guides, eight sets of electrolysis apparatuses, sodium sulfate electrolyte, molecular modeling materials, fuel cell simulation materials, and a model hydrogen fuel cell car kit with a detailed manual.

- Teacher and Student Guides: $6.00
- H₂ Educate Kit: $550.00
- Class of 30 Student Guides: $50.00
- Class Set of Consumables: $80.00
Hydropower Curriculum

Written at four levels, primary, elementary, intermediate, and secondary students learn about the water cycle, kinetic energy transformations, and electricity. The hydropower curriculum includes background information and hands-on, kit-based activities. Guides are included in the kits, but may also be purchased separately.

Wonders of Water and Kit
Grades 3-5

Elementary students learn about the forms of energy, electricity, electrical circuits, properties of water, the water cycle, and how water is used as an energy source through reading, hands-on investigations, and language arts activities. The kit includes a Teacher Guide, a class set of 30 Student Guides, and the materials necessary to conduct the activities.

Teacher and Student Guides $5.00
Wonders of Water Kit $200.00
Class Set of 30 Student Guides $60.00
Class Set of Consumables $35.00

WATER AND ENERGY AND KIT
Grades K-2

Primary students are introduced to the forms of energy, properties of water as a solid, liquid, and gas, and the concept of moving water as an energy source through language arts and inquiry-based, hands-on activities. The kit includes a Teacher Guide, a class set of 30 Student Guides, and the materials necessary to conduct the activities.

Teacher and Student Guides $5.00
Water and Energy Kit $225.00
Class Set of 30 Student Guides $60.00
Class Set of Consumables $35.00
ENERGY OF MOVING WATER AND KIT
Grades 6-8

In this unit, intermediate students will develop a comprehensive understanding of energy, electricity, hydropower, and emerging ocean energy technologies through inquiry-based activities and background reading. The kit includes a Teacher Guide, a class set of 30 Student Guides, and the materials necessary to conduct the activities. The kit also includes the materials needed to build six model hydropower turbine generators.

EXPLORING HYDROELECTRICITY AND KIT
Grades 9-12

These integrated and inquiry-based activities provide secondary students with a comprehensive study of the scientific, economic, environmental, technological, and societal aspects of hydropower. The kit includes a Teacher Guide, a class set of 30 Student Guides, and the materials necessary to conduct the activities. The kit also includes the materials needed to build six model hydropower turbines.

NUCLEAR ENERGY
Grades 6-12
Through background information and hands-on activities, students will learn the chemistry and physics of the uranium atom, the process of fission, the history of nuclear energy, and its role in producing electricity. A culminating assignment at the close of the unit has students researching and preparing for a mock Nuclear Regulatory Commission hearing regarding the building of a new nuclear reactor. The guides each contain detailed teacher guides and instructional masters.

Energy From Uranium (6-8)
Exploring Nuclear Energy (9-12)

SCHOOLS GOING SOLAR
Grades 6-12
This guide provides lessons and activities to support and incorporate installed photovoltaic systems into the classroom learning environment.

U.S. ENERGY GEOGRAPHY
Grades 4-12
This HTML-based resource includes U.S. maps covering all ten energy sources, energy production, energy consumption, and more! These maps are an excellent resource for any energy-related discussion or multi-disciplinary activity.

WIND FOR SCHOOLS
Grades 4-12
This guide provides lessons and data-driven activities to support and incorporate small wind systems into the classroom learning environment.

OIL AND NATURAL GAS AND KIT
Grades K-12
Through background reading and hands-on activities, students are introduced to oil and natural gas formation, composition and properties, exploration, production, processing, liquefaction, transportation, uses, and careers in the oil and natural gas industries. Students will explore sound waves, take core samples, examine physical properties of the rocks that trap oil and natural gas, and practice recovering fluids from various structures. The kit includes all three leveled guides for primary, elementary, and intermediate/secondary students with detailed teacher instructions, student worksheets, and necessary masters and manipulatives. The kit also includes a set of materials to necessary to conduct the activities in station format.

Oil, Natural Gas, and Their Energy (K-2) $5.00
Wonders of Oil and Natural Gas (3-5) $5.00
Exploring Oil and Natural Gas (6-12) $5.00
Oil and Natural Gas Kit $250.00

FOSSIL FUELS TO PRODUCTS
Grades 7-12
Hands-on activities and background information introduce students to fossil fuels and the processes involved to create many of the products we use daily. Students learn about exploration, production, refining, chemical manufacturing, transportation, marketing, and uses of petroleum, natural gas, and their products in the industrial sector. Fossil Fuels to Products is great for upper intermediate students and secondary students and works very well with the Exploring Oil and Natural Gas kit shown above.
Written at four levels, primary, elementary, intermediate, and secondary students learn about solar energy transformations including solar energy to thermal energy and solar energy to electricity. All levels include hands-on investigations and activities. Guides are included in the kits, but may also be purchased separately.

THE SUN AND ITS ENERGY AND KIT
Grades K-2

Primary students are introduced to solar energy with a read-aloud book and classroom-based activities. Students will learn that the sun's energy produces light, transforms to heat, powers the water cycle, produces wind, and that solar cells convert radiant energy into electricity. The kit includes an all-encompassing teacher and student guide and the materials necessary to conduct the activities.

The Sun and Its Energy Guide $ 5.00
The Sun and Its Energy Kit $ 250.00
Class Set of Consumables $60.00

WONDERS OF THE SUN AND KIT
Grades 3-5

Elementary students develop a basic understanding of solar energy through background reading and classroom activities. Hands-on activities demonstrate solar energy transformations into kinetic energy, thermal energy, chemical energy, and electricity. The kit includes a Teacher Guide, a class set of 30 Student Guides, and the materials necessary to conduct the activities.

Teacher and Student Guides $ 5.00
Wonders of the Sun Kit $ 325.00
Class Set of 30 Student Guides $ 50.00
Class Set of Consumables $55.00
ENERGY FROM THE SUN AND KIT
Grades 6-8
Intermediate students learn about solar energy through investigations that explore radiant energy transforming into thermal energy, kinetic energy, chemical energy, and electricity. The kit includes a Teacher Guide, a class set of 30 Student Guides, and the materials necessary to conduct the activities.

Teacher and Student Guides $ 5.00
Energy From the Sun Kit $ 375.00
Class Set of 30 Student Guides $ 50.00
Class Set of Consumables $40.00

EXPLORING PHOTOVOLTAICS AND KIT
Grades 9-12
Secondary students learn how solar energy is used to generate electricity. Students are introduced to photovoltaic systems, concentrated solar power, and developing solar technologies. Activities explore how photovoltaic cells work and what variables affect their electrical output. The kit includes a Teacher Guide, a class set of 30 Student Guides, and the materials necessary to conduct the activities.

Teacher and Student Guides $ 5.00
Exploring Photovoltaics Kit $ 300.00
Class Set of 30 Student Guides $ 50.00
Written at four levels, primary, elementary, intermediate, and secondary students learn about wind formation, the history of wind use, and how wind is used to generate electricity. All levels include multiple hands-on investigations and activities. Guides are included in the kits, but may also be purchased separately.

**WIND IS ENERGY AND KIT**

**Grades K-2**

Students begin to develop an understanding of how wind is formed and used as an energy source through hands-on activities and teacher-supported reading. Students will learn to measure wind speed and direction, and investigate how wind can do work. The kit comes with a Teacher Guide, a class set of 30 Student Guides, and the materials necessary to conduct the activities, including two KidWind Weightlifter Turbines.

- Teacher and Student Guides: $5.00
- Wind is Energy Kit: $325.00
- Class Set of 30 Student Guides: $50.00
- Class Set of Consumables: $62.00

**WONDERS OF WIND AND KIT**

**Grades 3-5**

Elementary students learn about wind through reading and activities that focus on observation and inquiry. Students will learn to measure wind speed and direction, and will investigate how wind does work and generates electricity. The kit comes with a Teacher Guide, a class set of 30 Student Guides, and the materials necessary to conduct the activities, including one KidWind Weightlifter Turbine and one KidWind Geared Turbine.

- Teacher and Student Guides: $5.00
- Wonders of Wind Kit: $375.00
- Class Set of 30 Student Guides: $50.00
- Class Set of Consumables: $55.00
**ENERGY FROM THE WIND AND KIT**

Grades 6-8

Intermediate students develop a comprehensive understanding of wind formation, wind energy, and electricity generation from wind through reading, critical thinking activities, hands-on investigations, and engineering challenges. The kit comes with a Teacher Guide, a class set of 30 Student Guides, and the materials necessary to conduct the activities, including two KidWind Geared Turbines.

Teacher and Student Guides $5.00
Energy From the Wind Kit $525.00
Class Set of 30 Student Guides $50.00
Class Set of Consumables $55.00

**EXPLORING WIND ENERGY AND KIT**

Grades 9-12

These hands-on, critical thinking activities help students to develop a comprehensive understanding of the scientific, economic, environmental, technological, and societal aspects of wind energy. Students are challenged to design the optimum blades for a turbine and consider the best place to locate a turbine. The kit comes with a Teacher Guide, a class set of 30 Student Guides, and the materials necessary to conduct the activities, including two KidWind Geared Turbines.

Teacher and Student Guides $5.00
Exploring Wind Energy Kit $550.00
Class Set of 30 Student Guides $50.00
Class Set of Consumables $55.00
Step Three
ELECTRICITY AND MAGNETISM

COAL, HYDROGEN, HYDROPOWER, OIL AND NATURAL GAS, NUCLEAR, SOLAR, AND WIND

These sources of energy units each include information on electricity generated from the renewable and nonrenewable sources that power our nation. Each source contributes differently to electric power generation and the activities and text within each guide address its generation, delivery to customers, technologies available, and even related careers.

See descriptions of the curricula and kit inclusions on pages 16-24.

CURRENT ENERGY AFFAIR
Grades 6-12

This activity is modeled after a television news broadcast, with student-correspondents reporting on seven major areas of electric power generation.

ELECTROWORKS
Grades 4-7

This guide includes background information and hands-on experiments that explore the basic concepts of atomic structure and electricity. Center-based experiments on static electricity, batteries, magnets, electromagnetism, and circuits are included.

ENERGY GAMES AND ICEBREAKERS
Grades K-12

Electric Connections is an activity featured within Energy Games and Icebreakers. First, students individually estimate and rank the yearly production of electricity for the nation’s top ten energy sources. In groups, students compare their responses, and rank the energy sources as a group. Finally, students compare their rankings with actual production figures. This activity and others within this guide help to reinforce energy sources and their contributions to electricity.

ENERGY INFOBOOKS AND INFOBOOK ACTIVITIES
Grades K-12

Energy Infobooks have extensive information on electricity. Energy Infobook Activities have student worksheets to accompany the electricity factsheets. All four levels of the Energy Infobooks are contained in the NEED Curriculum Packet. They are revised and updated annually.

See page 14 for Infobook pricing and availability.

ENERGY STORIES AND MORE
Grades K-5

This guide contains a series of stories and hands-on activities that can be used to introduce basic energy concepts such as electricity to primary and elementary students.

MISSION POSSIBLE
Grades 9-12

Mission Possible is an activity in which students are challenged to develop an energy plan to provide more electricity for a growing country. Students consider the advantages and disadvantages of the energy sources available for them to use so that they can increase electricity production while maintaining environmental quality and quality of life.

SMART METERS
Grades 6-8

Smart Meters allows students to explore smart meter technology, investigate electricity consumption of common devices, and determine ways to reduce energy consumption at home.

THE SCIENCE OF ELECTRICITY
Grades 5-12

This engineering and design activity tasks students with assembling their own generator model, using magnets, wire, and simple lab items. After assembling the model to specifications and observing its function, students can aim to optimize the design of the model, utilizing fewer or less costly materials to generate a larger amount of electrical output – a real-world challenge for electrical engineers. The Science of Electricity can be downloaded individually, but is also found within several of NEED’s energy source units including coal, hydropower, and nuclear.

WONDERS OF MAGNETS
Grades 1-4

Students explore the basics of magnets and magnetism through background reading and hands-on, center-based experiments.
ENERGY AND OUR RIVERS
Grades 6-12

This module examines how energy sources are transported along the nation's rivers. Hands-on science and social studies activities encourage students to think about the importance of rivers as modes of transportation.

ENERGY EXPOS
Grades 4–12

Students work in groups to develop hands-on exhibits and make presentations to teach others. Teacher and student instructions for exhibits focusing on energy sources, transportation fuels, and energy conservation are included in this guide.

ENERGY STORIES AND MORE
Grades K-5

This guide contains a series of stories and hands-on activities that can be used to introduce basic energy concepts including transportation to primary and elementary students. For example, students learn about the formation of petroleum in "Under The Sea," drilling for oil in "Into Deep Water: Drilling for Oil and Gas," and about the oil embargo of 1973 in "A Car Trip for Carlos." Supplemental activities are included along with each story.

H2 EDUCATE
Grades 6-12

This intermediate and secondary unit introduces students to hydrogen as an important energy carrier for the future, both as a fuel for distributed electricity generation and as a transportation fuel.

See page 20 for kit details and pricing.

HYBRID BUSES
Grades K–12

These guides teach students about hybrid electric buses and encourage them to evaluate the economic and environmental advantages and disadvantages of such vehicles.

TRANSPORTATION FUELS
Grades 2-10

Students of all ages take an interest in transportation. In these guides, students will become familiar with modes of transportation, fuels used for transportation, and emerging technologies in transportation. Student backgrounders, vocabulary and math activities, and hands-on lab activities will help students to develop an understanding of the economic, environmental, and societal impacts of using various transportation fuels to move people and goods, and how they can become educated consumers as they choose how they get around.

Transportation Exploration (2-5)
Energy on the Move (6-10)

TRANSPORTATION FUELS DEBATE
Grades 6-12

Students evaluate the advantages and disadvantages of conventional and alternative transportation fuels in a debate format. Teacher instructions and instructional masters are included to help students develop arguments on the merits of each fuel.

TRANSPORTATION FUELS ENIGMA
Grades 7-12

Students put on their detective hats to research clues and uncover energy facts about transportation fuels in this cooperative learning activity. Teams use reading, critical thinking, and organizational skills to conceal the identity of their transportation fuel while trying to guess which fuels the other teams represent. Teacher instructions and instructional masters are included.

TRANSPORTATION FUELS LIVE!
Grades 4-12

Student musical groups write songs and sing about transportation fuels in this amped up activity. Audiences learn more from these energy stars as they tell their stories to interviewers out to get the latest scoop. Teacher and student instructions are included, along with sample songs and interviews to get students rockin’ and rollin’.
CHEMISTRY AND ENERGY EFFICIENCY
Grades 9–12

In this web-based curriculum, teachers and students take an in-depth look at chemistry in daily life, the use of energy by the chemistry industry, life cycles of products and activities, careers in the chemistry industry, and the impact the chemistry industry has on carbon dioxide production and climate change. Chemistry and Energy Efficiency can be viewed at http://chemistry.need.org.

CLIMATE CHANGE
Grades 6–12

This curriculum addresses current concerns about climate change and the science behind the carbon cycle. Students will understand why we use the sources we do for energy, and how their use is impacting the global climate, through these hands-on, critical thinking activities.

Understanding Climate Change (6–8)
Exploring Climate Change (9–12)

ENERGY CONSERVATION CONTRACT
Grades 4–12

In this outreach activity, students learn about energy conservation and ask their families to sign contracts in which they agree to save energy. Students then calculate the energy savings, and re-evaluate their conservation measures.

ENERGY EXPOS
Grades 4–12

Students work in groups to develop hands-on exhibits and make presentations to teach others. Teacher and student directions for exhibits that focus on energy sources, transportation fuels, and energy conservation are included.

ENERGY GAMES AND ICEBREAKERS
Grades K–12

This guide contains entertaining introductory energy activities and games that also reinforce efficiency and conservation measures. Activities include Energy Chants, Energy Bingo, America’s Most Wanted Energy Wasters, Energy Web Game, and more!

ENERGY HOUSE
Grades 4–8

In this activity, students learn about efficiency, conservation, and diminishing returns by using various materials to build and insulate a model house and then test its efficiency.
ENERGY INFOBOOKS
Grades K-12

Energy Infobooks are a great supporting resource for many NEED activities and include an introduction to energy, information on major sources of energy, new technologies, energy conservation, electricity, climate change, and other energy information. They are available on four reading levels and are revised and updated annually.

See page 14 for pricing.

PLUG LOADS
Grades 6-12

This unit guides students through an in-depth investigation of electricity consumption by appliances and machines in the school building. Students gather data, calculate energy use and economic and environmental costs over time, and determine ways to reduce consumption. Students also explore phantom or vampire loads and the many operational modes electrical devices employ. Instructional masters are included and digital copies of spreadsheets are available at www.NEED.org.

BUILDING BUDDIES AND KIT
Grades 2-3

Primary students are introduced to basic concepts of energy use and conservation, using the school as a learning laboratory and then extending to home energy use and conservation measures. Students monitor and evaluate energy conservation behaviors daily. Individual students and classrooms are recognized for energy-saving habits and being good Building Buddies. The kit includes a Teacher Guide, a class set of 30 Student Guides, rewards, and the materials necessary to conduct the activities.

Teacher and Student Guides $ 5.00
Building Buddies Kit $ 150.00
Class Set of 30 Student Guides $ 50.00
Class Set of Consumables $45.00

MONITORING AND MENTORING AND KIT
Grades 4-8

Students are introduced to methods of measuring energy consumption, determining costs, and quantifying environmental effects through a series of hands-on activities that use the school building as a learning laboratory. Students conduct surveys of the school building and school energy consumption—gathering, recording, and analyzing data, and monitoring energy usage. The kit includes a Teacher Guide, a class set of 30 Student Guides, and the materials necessary to conduct the activities.

Teacher and Student Guides $ 6.00
Monitoring and Mentoring Kit $ 350.00
Class Set of 30 Student Guides $50.00
Class Set of Consumables $20.00
LEARNING AND CONSERVING AND KIT
Grades 7-12

In this activity, students explore energy consumption and conservation by reading utility meters and utility bills, comparing EnergyGuide labels, and exploring electric nameplates. Students conduct comprehensive surveys of the school building and school energy consumption—gathering, recording, and analyzing data, and monitoring energy usage. Students work in groups to develop comprehensive energy management plans for the school that include suggestions for retrofits, systems management, and conservation practices. The kit includes a Teacher Guide, a class set of 30 Student Guides, and the materials necessary to conduct the activities.

Teacher and Student Guides $6.00
Learning and Conserving Kit $275.00
Class Set of 30 Student Guides $50.00

SAVING ENERGY AT HOME AND SCHOOL AND KIT
Grades 3-12

Students explore energy sources, efficiency, and conservation with hands-on activities for the home and classroom environments. Students and families install measures from the Home Energy Efficiency Kits that correspond to the lessons learned in the classroom, and discuss their own energy use. The kit includes a Teacher Guide, a class set of 30 Student Guides, a class set of 30 Energy Savers Booklets, a class set of 30 Home Energy Efficiency Kits, and all the tools and materials necessary to complete the activities.

Teacher and Student Guides $6.00
Saving Energy at Home and School Kit** $1,050.00
Class Set of 30 Student Guides $70.00

**The Saving Energy at Home and School Kit comes with 30 Home Energy Efficiency Kits, allowing students to implement energy saving measures at home.

For Administrators and Facilities Staff

ENERGY MANAGEMENT GUIDE FOR SCHOOLS
This guide is designed to assist school and community leaders and partners in developing and implementing an ongoing school-wide energy plan. The plan will promote energy efficiency through education and reduce energy consumption at school.

BLUEPRINT FOR SCHOOL ENERGY TEAMS
This guide is an excellent tool for schools seeking to lower energy related expenses through the formation of a student energy team and the adoption of school-wide energy policies. School leaders and administrators will find a comprehensive plan for getting started and managing ongoing programs while involving their student body.
SCHOOL ENERGY SURVEY
Grades 9-12
Students investigate all aspects of their school’s energy consumption by conducting a comprehensive energy audit and developing an energy conservation plan to implement.

SOLID WASTE, ENERGY, AND RECYCLING
Grades K-12
Students learn about solid waste, its relationship to natural resources and energy, and options for handling solid waste including recycling, landfilling, waste-to-energy plants, and incineration.

All About Trash (K-2)
Talking Trash (3-5)
Museum of Solid Waste and Energy (6-12)

TODAY IN ENERGY
Grades K-8
These activities introduce students to the economics of energy use. Choices, trade-offs, and costs are explored using math and critical thinking skills.

USING AND SAVING ENERGY
Grades K-1
This guide introduces students to basic concepts of energy use and conservation at home in a read-aloud format and provides suggested activities.
DIGITAL ENERGY
Grades 5-12
In Digital Energy students are tasked with researching an energy topic and creating a digital media presentation that teaches others about their topic. Throughout the project, students will analyze the importance of graphic elements in learning and presenting, and must synthesize the information they read to create their own graphics. Digital Energy projects also encourage students to prepare a script, write an assessment for their audience, and facilitate discussion after presenting. This activity is great for differentiated environments and multi-disciplinary classrooms, and can be a great building block after completing Energy Expos in your classroom.

ENERGY FAIR
Grades 1-5
This module is a guide to teaching students experimental design with an emphasis on developing energy-related science fair projects. Sample science projects are also available on the NEED website at www.NEED.org/sciencefair.

ENERGY GAMES AND ICEBREAKERS
Grades K-12
This guide contains entertaining activities to introduce energy, efficiency, and conservation to students, as well as reinforce the information that has already been presented.

ENERGY IN THE BALANCE
Grades 3-5
This activity encourages elementary students to evaluate the advantages and disadvantages of the major energy sources through a series of charting and graphing activities.

ENERGY JEOPARDY
Grades 4-12
Students will enjoy NEED’s spin on the popular trivia game show. Jeopardy categories that help to reinforce your energy unit include: More MPGs, Famous Americans in Energy, Leading Nations, and more. A digital version of the game is available at www.NEED.org.

ENERGY LIVE!
Grades 4-12
In this amped-up activity, student musical groups write songs and sing about energy sources, electricity, and conservation and efficiency. Audiences learn more from these energy stars as they tell their stories to interviewers out to get the latest energy scoops. Teacher and student instructions are included, along with sample songs and interviews to get students rockin’ and rollin’.

ENERGY MATH CHALLENGE
Grades 3-12
The Energy Math Challenge strengthens students’ math and critical thinking skills while increasing their knowledge of energy. Students work individually or in teams to solve energy math problems.
ENERGY ON STAGE
Grades 4-12
This resource uses plays and poems to reinforce the energy sources and energy conservation. Each play includes an individual teacher guide that has expanded vocabulary and activity extensions.

GLOBAL TRADING GAME
Grades 5-12
In this cooperative learning activity developed by the Ohio Energy Project, students become economic advisors, geologists, international traders, and miners as they analyze their assigned country’s resources and needs, then trade resources with other countries to enhance their economic position and environmental quality.

GREEK MYTHOLOGY AND ENERGY
Grades 4-8
This guide provides resource materials and a teacher guide for incorporating Greek mythology into your science curriculum. This innovative interdisciplinary activity focuses on the forms of energy and was developed by Donna Quillen of North Carolina.

MYSTERY WORLD TOUR
Grades 4-8
In this activity, students identify the energy challenges of different countries around the world and compare them to the United States. Students create a proposal and a presentation to share with the class, who will tour and try to identify each mystery nation.

NEED SONGBOOK
Grades K-12
Reinforce energy concepts and sing along to NEED’s favorite songs, including the NEED Clap, NEED students are High-Minded, E-N-E-R-G-Y, and What Do You Do With An Energy Waster?

THIS MINE OF MINE
Grades 2-6
This hands-on set of activities allows students to dig deep as they explore the formation, geology, recovery, and uses of coal, as well as reclamation of mine sites.

YESTERDAY IN ENERGY
Grades 4-8
This activity allows students to travel back in time without leaving the classroom. Students conduct interviews and do research to learn about and create exhibits depicting energy use in the good old days.
Step Seven

EVALUATION

Evaluation and assessment are important components of any energy unit and should be ongoing. NEED offers many assessment and evaluation tools for teachers to use. Check out NEED’s assessments and evaluation page for more information, example rubrics, and other tools: www.NEED.org/evaluation.

ENERGY POLLS
Grades K-12

Use one of NEED’s Energy Polls prior to beginning your unit and as you close your unit. There are polls on four reading levels—primary, elementary, intermediate, and secondary. Polls can be returned to NEED for analysis. Show us what your students are learning!

Many NEED guides and activities also contain unit exams and suggestions for how to evaluate student performance. Please feel free to modify these suggestions as necessary.

Download the basic polls at www.NEED.org/evaluation.

QUESTION BANK
Grades K-12

NEED’s online Question Bank gives teachers the ability to customize evaluation tools for their energy units. There are questions at four grade levels: primary, elementary, intermediate, and secondary. At each grade level, the questions are divided into the following topics: Science of Energy and Forms of Energy, Sources of Energy, Electricity, Transportation, and Conservation and Efficiency. Under each topic, knowledge, comprehension, multiple choice, and higher order thinking questions are included. You can access the online Question Bank at www.NEED.org/evaluation.

CURRICULUM CORRELATIONS

NEED has correlated all materials to meet relevant standards for learning. NEED materials support Next Generation Science Standards, Common Core State Standards for English/Language Arts and Mathematics, and individual state science standards, where applicable. Access the correlations files for the relevant standards by visiting NEED’s evaluation page or the correlations page: www.NEED.org/curriculumcorrelations.
Step Eight

STUDENT LEADERSHIP AND OUTREACH

An integral part of NEED’s curriculum is the Kids Teaching Kids approach. Students are most authentically assessed when they have to share their knowledge with others. Encouraging students to become leaders in the classroom and school also helps ensure that students are empowered to become good stewards for energy awareness in their communities.

ENERGY OUTREACH OVERVIEW

Step One – Focus!

Effective energy outreach projects allow the whole class to get involved. Set your goals as a group. Identify the group(s) you want to reach with your activities. Do you want to focus on just your school, or do you want to include families, other schools, community leaders, senior citizens, or the whole community? It is also important to select the focus for your activities. Do you want to increase energy awareness, institute a school-wide program, do a community demonstration, correct individual problems, or change community policy? Maybe you’ve identified several focus points or goals. Make a folder or poster for each goal in your project, and assign committees of students to work on each.

Step Two – Plan it Out!

Student committees should meet to create a plan for each goal. Plans should identify the objectives, activities, estimated time, potential costs, materials needed, and who will be involved with helping to accomplish each goal. Ask students to think outside the box – who can they incorporate from the community? All groups should meet and discuss the plans as a whole class to create a master plan. Identify dates for each task to be completed. Mark dates on a calendar or timeline for the whole class.

Step Three – Work it Out!

Group members should sign up for tasks or select tasks to complete. Assist groups to make sure they have enough manpower to complete their projects. Committee members should work together, meet together, and accomplish their goal(s) to make sure the project is completed. Make sure each group is documenting their activities, taking pictures to share with their community and NEED!

Step Four – Take Pride!

Evaluate the progress of the projects at group meetings and as a class. Ask community members or school partners to evaluate your progress and share in your successes. Summarize your efforts for each goal and the overall master plan.
NOW WHAT?

NEED encourages classrooms who complete energy outreach projects to turn their projects into Youth Awards Projects. The Youth Awards Program for Energy Achievement rewards students for their outreach efforts. Check out the descriptions below, learn more about the program and projects in our Youth Awards Program Guide, and visit NEED’s Youth Awards website: www.NEED.org/youth-awards.

YOUTH AWARDS PROGRAM OVERVIEW

The Youth Awards Program for Energy Achievement is a central component of NEED’s evaluation and recognition, recognizing student leadership, encouraging students to evaluate their knowledge of energy, and providing ideas and programs that may be exchanged with other schools in the NEED program. NEED encourages all schools to participate in Youth Awards by having their students document their energy activities and projects and submit them to NEED for judging.

Students should keep track of their goals, activities, outreach opportunities, and their evaluations of their activities. Students will then create a digital project summarizing their efforts to submit for judging. Students can submit two different types of projects, depending on their engagement in the activities and outreach completed. The deadline for project submissions is April 15, 2018.

RECOGNITION

In 2018, the 38th Annual NEED Youth Energy Conference and Awards Program will give students more opportunities to learn about energy and to explore energy in STEM (science, technology, engineering, and math). The annual June conference will have students from across the country working in groups on an Energy Challenge designed to stretch their minds and energy knowledge. A limited number of spaces are available for a special two-day pre-conference event, which will allow students additional opportunities to engage in hands-on energy learning, time to discuss energy with their peers, and access to industry professionals.

The Youth Energy Conference will be held in Washington, D.C., June 22-25, 2018. The conference culminates with the Youth Awards Ceremony. Winning students whose projects fit the criterion for judging are eligible to attend the ceremony and network with students from across the country! Other projects will also be recognized at the local level for their outstanding efforts in the classroom and community.

YOUTH AWARDS PROGRAM GUIDE

For project descriptions and guidelines, application and submission procedures, and more information about the program and recognition ceremony, be sure to turn to NEED’s Youth Awards Program Guide. This guide serves as a handbook to outline the process of engaging your students in energy outreach, leadership, and fun. It also contains templates for student work, project suggestions and tips, and even the judging rubric! Also, check out www.NEED.org/youth-awards. The guide to the program can be downloaded here, as well as photos from past events, previous winning projects, and FAQs. We hope to see you in June!
Integrated Energy Unit Planner

USE THIS PLANNER TO BEGIN MAPPING OUT YOUR ENTIRE ENERGY UNIT OR GROUP OF ENERGY LESSONS.

Primary selected CONTENT areas (Science, Language Arts, etc.)

Describe the TOPIC, CONCEPT, or “BIG IDEA”:

Describe how this topic connects or relates to ENERGY:

Describe how other content areas can contribute to or be integrated into the selected TOPIC:

Language Arts:

Math:

Science:

Social Studies:

Technology/Creative Arts:
Describe how the topic can be related to the students’ communities, families, or their lives:

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

Describe how the topic can be related to potential careers:

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

Describe how the topic can involve or incorporate the whole school or community:

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

List the materials and curriculum pieces involved in learning about the topic:

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

Describe the assessment tools used for the topic:

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

NEED Merchandise

NEED TOTES
NEED totes are large, sturdy carry-alls made with 100% post-consumer recycled PET. The NEED logo is printed on the outside pocket.

Tote $12.00

NEED T-SHIRTS
NEED t-shirts with the NEED 2017-2018 design. Shirts are available in adult sizes S-XXL. Call for availability.

T-Shirt (S, M, L, XL) $12.00
T-Shirt (XXL) $15.00

ENERGY LAB FOR KIDS
Prepared by Emily Hawbaker and the expert team at NEED Project, the lab activities in this book will let you explore almost everything about energy - what it is, how we find it, how we use it, and how we can save it.

Energy Lab for Kids Book $20.00
**FLICKER CHECKERS**

Used in many of our efficiency and conservation modules, spin the Flicker Checker and discover whether the fluorescent lights in your school have magnetic or electronic ballasts.

Flicker Checker $2.00

**NEED PENS**

NEED pens are made from recycled plastic with NEED information imprinted on the shaft.

Pen $1.50

**NEED PENCILS**

NEED pencils demonstrate thermal to chemical energy transformations! It only takes a few seconds for the thermal energy from your hand to change the color of the pencil. NEED information is imprinted in black. Pencil colors vary.

Pencil $0.50

**NEED STROBES**

NEED strobos are flashing gold light bulbs with The NEED Project website on the front and an on/off button on the back.

Strobe $2.00

**POLAR BEAR AND FISH BUTTONS**

Polar Bear and Fish Buttons for those who can figure out the answers to the fun riddles.

Polar Bear Button $0.50
Fish Button $0.50

(Riddles can be found online at www.NEED.org)
Order Materials Online!

Anemometers and solar cells and light meters--oh my!
Getting your kits (or refills) has never been easier! Check out 
NEED’s official online store at [http://shop.need.org](http://shop.need.org)

**ADDITIONAL NEED MERCHANDISE**

Did you attend a workshop or see a piece of merchandise 
online, but don’t see it listed in the catalog? NEED 
merchandise varies throughout the year and is not always 
included in the catalog. For questions about additional 
merchandise e-mail info@NEED.org, or call 1-800-875-5029.

A New Way 
to Download!

All titles in NEED’s library can now be 
downloaded from NEED’s online store. PDFs of the guides are available for FREE download.

Visit NEED’s shop at [www.shop.need.org](http://www.shop.need.org)
